

Amendments to and Listing of the Claims:

Please amend claims 1 and 11-13 and cancel claims 18 and 19, so that the claims read as follows:

1. (Currently Amended) A cooker hob glass ceramic surface cleaning agent ~~for glass ceramic surfaces~~, comprising a quantity of abrasive agent, a thickening agent, and a pH value of about 2 to 3 less than 6, wherein the abrasive agent comprises particles of an organic material.
2. (Previously Presented) The cleaning agent as claimed in claim 1, wherein the abrasive agent comprises at least 20 % by weight organic material.
3. (Previously Presented) The cleaning agent as claimed in claim 2, wherein the abrasive agent consists essentially of organic material.
4. (Previously Presented) The cleaning agent as claimed in claim 1, wherein the abrasive agent content is not more than 10 % by weight of the cleaning agent.
5. (Previously Presented) The cleaning agent as claimed in claim 4, wherein the abrasive agent content is not more than 5 % by weight of the cleaning agent.
6. (Original) The cleaning agent as claimed in claim 1, wherein the abrasive agent comprises particles selected from the group consisting of polyolefin and polyurethane.
7. (Original) The cleaning agent as claimed in claim 6, wherein the particles comprise polyethylene.
8. (Previously Presented) The cleaning agent as claimed in claim 1, wherein the organic material is present as particles in a size range of about 10 to 1000 μm .
9. (Previously Presented) The cleaning agent as claimed in claim 8, wherein the organic material is present as particles in a size range of about 100 to 200 μm .
10. (Original) The cleaning agent as claimed in claim 1, wherein the abrasive agent also includes mineral particles.
11. (Currently Amended) A method of cleaning a glass ceramic surface of a cooker hob, comprising applying to the surface the cleaning agent according to claim 1.

11. (Currently Amended) A method of cleaning a glass ceramic surface of a cooker hob, comprising applying to the surface the cleaning agent according to claim 1.

12. (Currently Amended) The cleaning agent ~~for glass ceramic surfaces~~ according to claim 1, further comprising: a surfactant selected from the group consisting of a non-ionic surfactant, an amphoteric surfactant, an anionic surfactant, and a cationic surfactant; and an acid or acid mixture.

13. (Currently Amended) The cleaning agent ~~for glass ceramic surfaces~~ according to claim 12, further comprising a constituent selected from the group consisting of a solvent, a fragrance, a dye, a preservative, and a care-enhancing additive selected from the group consisting of polydimethyl siloxane, an organo-modified silicone, an amino-functionalized silicone, a silicon quat and a polyvinylpyrrolidone.

14. (Previously Presented) The cleaning agent according to claim 12, wherein the abrasive agent comprises a mixture of particulate organic material having a particle size of about 10 to 1000 μm and an inorganic abrasive.

15. (Previously Presented) The cleaning agent according to claim 14, wherein the mixture comprises at least 20% by weight of the organic material and a balance to 100% by weight of the inorganic abrasive.

16. (Previously Presented) The cleaning agent according to claim 12, further comprising a care-enhancing additive selected from the group consisting of polydimethyl siloxane, an organo-modified silicone, an amino-functionalized silicone, a silicon quat and a polyvinylpyrrolidone.

17. (Cancelled).

18. (Cancelled).

19. (Cancelled).
